Bio

Artist who developed skills through mentorship and attending college classes and residencies.

Artist Statement

Brutality can expose a raw creative internal almost feral world for me. I have always aimed to be a fine arts painter and worked hard to open my psyche and paint from that place. I like to explore “unbalancing” as a concept of the psyche that is always trying to trip me and us up. I work with internal feminine and masculine energies and how they translate externally in my oil painting. It is about the process.
