

*The Bride*

37 x 16 x 7 inches

Key sculpture

\$1,800

## Daniel Kotic

### Bio

I'm a caregiver, and five years ago, I thought I'd give sculptures a try, tack welding keys together. I learned how on youtube, then I started experimenting with foam-based sculptures, torsos, and horses; additionally, I've been writing movie scripts since 2014. I've completed several, and I'm working on several more. I've never placed higher than a finalist. I'm very dyslexic, and I have Narcolepsy, so writing wasn't even on the list of things I ever thought I'd do. Don't be fooled by the spelling here; I couldn't do it without Grammarly and Voice dictation.

### Artist Statement

This Bride is made entirely of brass keys, tack welded together, and covered with resin. Three sets of LED black lights illuminate chords of uranium glass. Another Bride is available without the lighting effect and a key torso without a Vader head also.
