Alice Newman

Artist Bio

Alice is a visual artist in her mid-twenties who graduated with a degree in studio art from Colorado State University, and has since found herself expanding her world in Arkansas.

Artist Statement

Alice loves to play with portraiture and proportions—she uses emotional exploration as a guide through her pieces, and attempts to relinquish control to her tools. There isn't always a specific message behind a piece, more a motive to work through the motions of creating. She feels that the process of creating is just as impactful as the final product, and oftentimes the meditation through making each piece becomes the message itself.
