Artist Statement

Patterns that exist around us have always been my source of inspiration. I collect memories from my travels all over the world and translate the emotions and qualities of nature and human touch that I've experienced. As a trained architect, my work is mostly structured and geometrical. I consider my work to be based on "place", not a physical space, but the place created by experiences, experimentation and studies of my surroundings whether that is the sand at the beach, the mountains, details on a building or the woods. Every piece is created with an idea in mind that takes shape as the process unfolds.
