Bio

I'm a proud wife, mom and nana. I have enjoyed others' photography my whole life. After my 31-year career as an elementary teacher/reading interventionist, I began to pursue my own photography with greater intention. It provides me with wonderful opportunities, both in learning how to photograph and in learning about my subjects. It gives me joy.

Artist Statement

What I love about nature photography is the necessary and delightful "slowing of sight." I observe light, shadow, color, texture, shape and movement in order to learn, plan, compose and convey details. With each behind-the-lens experience, I gain greater understanding of and appreciation for our world. The gratitude, in turn, makes me happy. *Dandelion* and *iridescent* allowed me to dwell in details in playful ways.
